Summary

Full Stack Developer with a background in Sales and Logistics. A clever problem solver with a dedication to learning new processes and refining them. Known for a friendly smile, attention to detail, and willingness to tackle a problem; no matter the size. Diligent in graduating University of Chapel Hill's Full Stack Development Certificate Program. This six Month Course was fast paced and required 42 hours a week of class and study in order to pass. This was all maintained while working a fulltime Job in sales. During this time, a full scale project was completed named SiteSeers. This website was designed to post, rent, and review Campsites. SiteSeers was developed using React JS as the primary language.

Technical Skills

Javascript, jQuery , GIT, React (Javascript Library), HTML, CSS, MySql, MongoDB, Node.js, Express.js, Progressive Web Applications (PWA), Responsive Design, Big "O" Notation, GitHub Repositories, and API interaction.
